

DISCLAIMER

This presentation includes certain statements that may be deemed forward looking. All statements in this discussion, other than statements of historical fact, which address future opportunities, potential, activities and events or developments that the Company expects, are forward looking statements.

Such forward-looking statements include, without limitation: (i) estimates of future mineral prices, supply, demand and/or production projections; (ii) estimates of future cash costs; (iii) estimates of future capital expenditures; (iv) estimates regarding timing of future identification, development, construction, production or closure activities; (v) statements regarding future exploration results; (vi) statements regarding cost structure, project economics, or competitive position, (vii) statements regarding application of advanced technologies including references to algorithms, artificial intelligence and/or machine learning, and; (viii) statements comparing the Company's impact towards the discovery of mines, projects or metals.

COMPANY EXPECTATIONS

Although the Company believes the expectations expressed in such forward looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the forward looking statements. Factors that could cause actual results to differ materially from those in forward looking statements include market prices, exploitation and exploration successes, continued availability of capital and financing, and general economic, market or business conditions. Investors are cautioned that any such statements are not guarantees of future performance, that the Company expressly disclaims any responsibility for revising or expanding the forward-looking statements to reflect actual results or developments, and that actual results or developments may differ materially from those projected, in the forward-looking statements, except as required by law.

Our Directors

Michel Fontaine President, CEO & Chairman

Mr. Fontaine is the founder of Windfall in 2005 and previously served as its president and CFO from 2015 and 2021. Prior to founding the company, Mr. Fontaine worked at Merrill Lynch and BMO Nesbitt Burns Inc. as a financial adviser. Mr. Fontaine also has extensive experience serving on the boards of public mining companies and has served on the board of Puma Exploration Inc. (TSX-V: PUMA) since 2020..

Marcel Robillard

Director

Mr. Robillard is an experienced geologist with over 25 years of experience in the mining industry. He has been the president and chief executive officer of Puma Exploration Inc. (TSX-V: PUMA) since 2009. Mr. Robilliard also serves on various boards of public mining companies, including Canadian Copper Inc. (CCI: CSE) and PEZM Gold Inc. (TSX-V: PEZM.H) and previously served as a director of BWR Exploration from 2016 to 2020.

Mario Drolet

Director

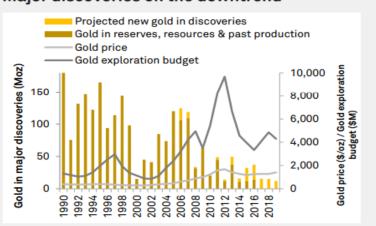

Mr. Drolet is a seasoned finance professional with over 30 years of experience across capital markets and investor relations globally. He is the founder and president of MI3 Financial Communications Inc., in which capacity he has worked with numerous mining companies providing financial communication and market intelligence services.

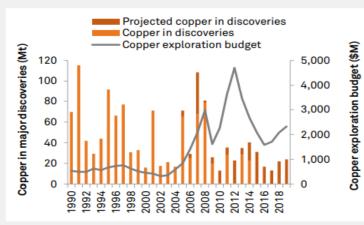

- **Time** Long
- High costs
- Low efficiency Today's method
- **Not ESG Friendly**
- Target prioritization is tough
- Obvious targets staked already
- Dilutive Financings

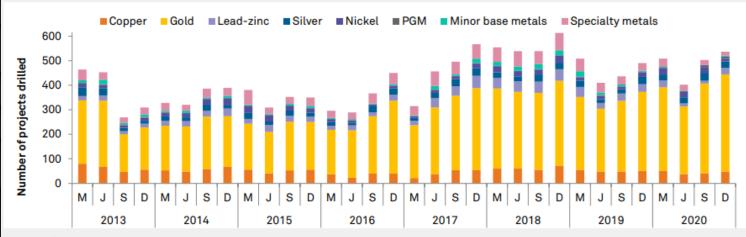

DISCOVERY & GRADE DOWNTREND

Major discoveries on the downtrend

The Tech

Windfall Geotek AI targeting technology analyzes all geological data to generate the highest similarity targets.

Our technology works for all metals.

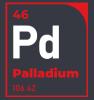

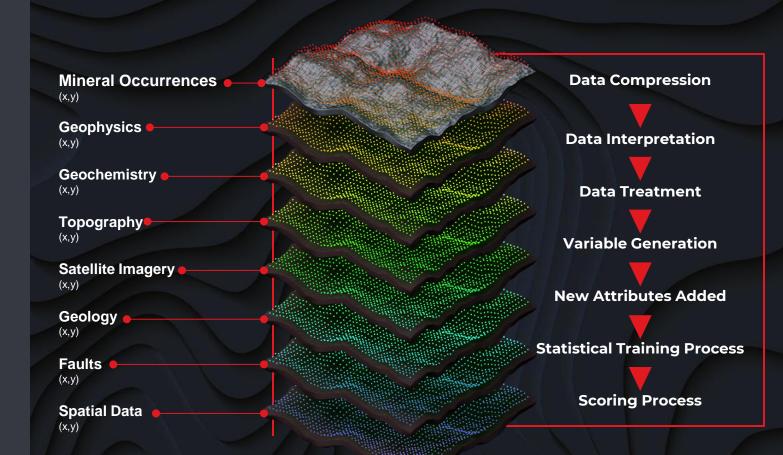

AI TARGET PROCESS

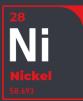

Geo Referenced Data

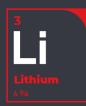

Proven & Tested

The future of **Digital Exploration**

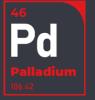

Longest standing public Al company in digital exploration

Numerous discoveries made 200+ Service **Contracts**

Clients discoveries

Proven and tested technology since 2005 that works on all metals

TIME

- ✓ Reduce time to discovery(10-20 days)
- ▼ Precision targeting saves time(1-2% of the entire project); focus on highest probability targets

TECHNOLOGY

Mineral Exploration has a very low success rate, our technology beats the out the average success rate.

COSTS

Save money and your share structure. Eliminate the guesswork and dilutive financings.

BEAT THE COMPETITION

Stand out from the competition by using AI technology that increases efficiency

Without Windfall Al

- Prospectors rely on Aerial surveys or walking the ground
- Lower chance of success, increased risk with investor capital
- Slow discovery & prospecting process
- More dilutive financings to fund inefficient exploration programs

With Windfall Al

- **Faster** timeline with higher odds of discovery
- More **successful** exploration programs
- Better Risk / Reward
- **Environmentally Friendly.** Precision targeting = less disruption to environment
- Increased market awareness through our website, social media & news releases

WINDFALL GEOTEK

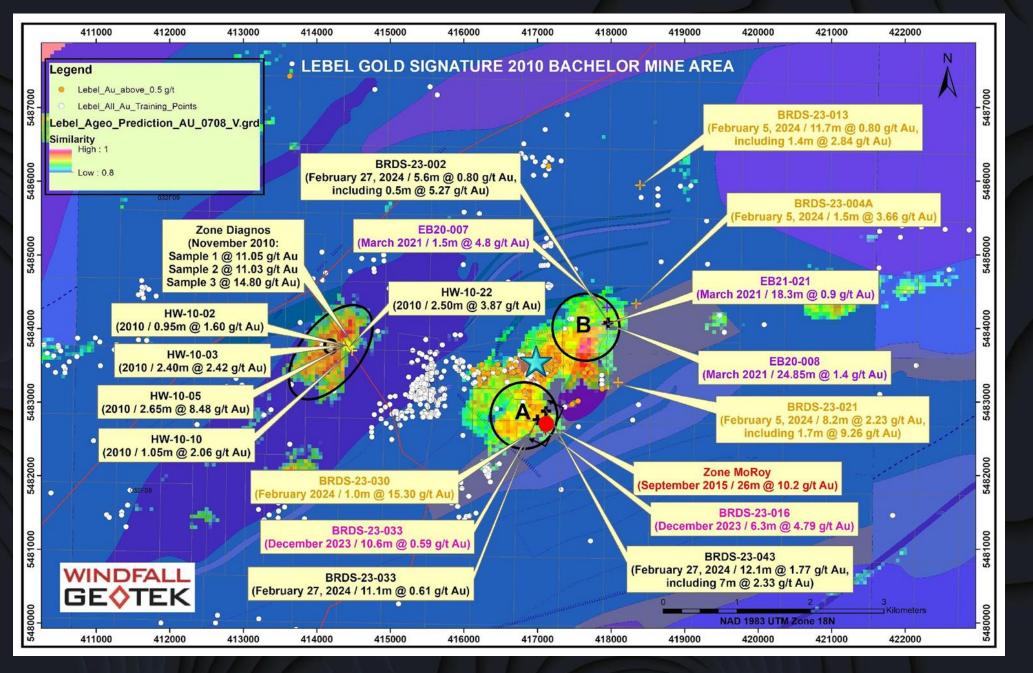

"Windfall Geotek brings both technology and exploration together, making the Windfall AI Systems one of the top tools that everyone should have in their toolbox when considering next steps in any stage of exploration. Geologists have had to physically walk unknown parts of the field to achieve first phase results where Windfall can provide highly probable targets and help reduce both cost and time on initial exploration programs. This, in turn with large datasets that Windfall can compute faster than the human brain can, helps further the knowledge of projects and accelerate programs in a sustainable manner".

Marcel Robillard

President & CEO of Puma Exploration - Geo

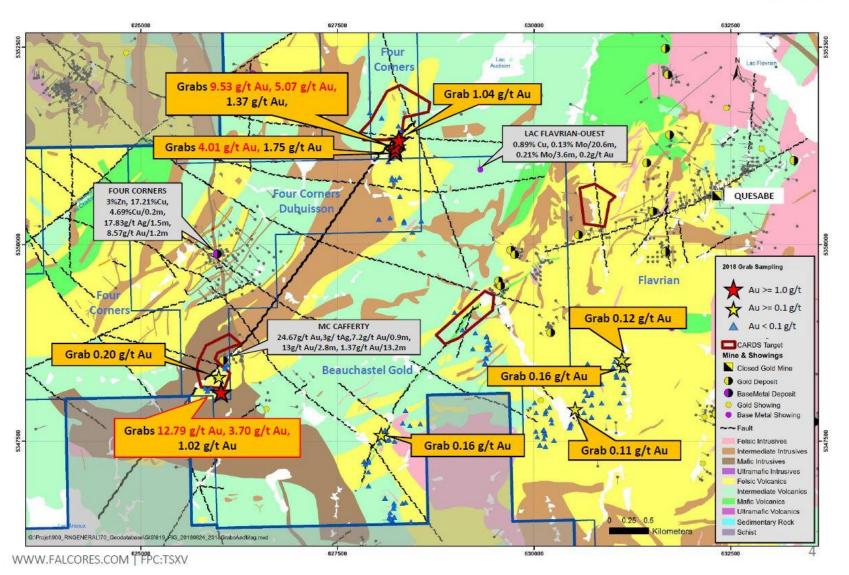

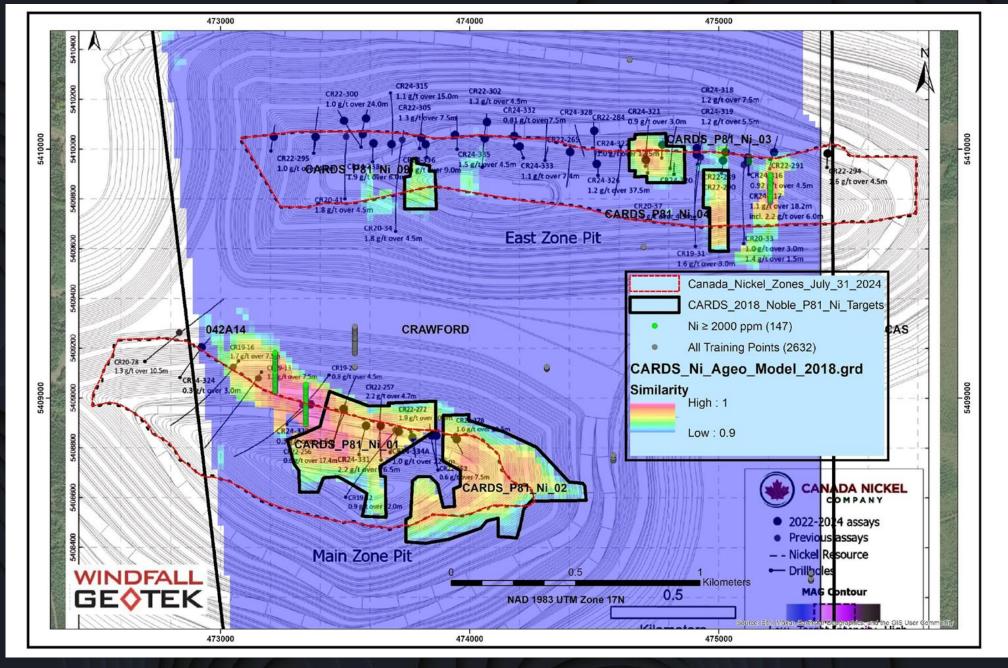

Four Corners Area – 2018 Field Work Results

Summary

Best Of All

Our technology increases shareholder value by increasing the odds of a successful discovery using Al 01

Artificial Intelligence

Leverage big data & computer processing to drill smarter, faster and achieve better outcomes

02

Proven & Probable

20 Years of Al Mineral Exploration. Numerous discoveries.

03

Save Time & Money

Shorten time to discovery with less capital

04

Investor Confidence

Use our Al targets to show the market your potential & increase investor confidence

05

Reduce Environmental Footprint

Precision targeting results in less guess work & disruption of natural habitat / earth. Improve relationship with local stakeholders.
